

SUPPLIES · BLOOD · CONTROLLED SUBSTANCES

# EMS Track LIVE

One inventory system for every supply, drug, and unit of blood your agency runs.

Built for the way EMS actually works. 24/7, on the truck, in the air, in the bay.

## 01 THE PROBLEM

EMS still runs inventory on clipboards, spreadsheets, and disconnected vendor portals. Expired meds, DEA compliance gaps, mid-call stockouts, and zero visibility across stations and units.

## 02 THE SOLUTION

EMS Track LIVE is the inventory platform purpose-built for 24/7 EMS operations. We predict shortages, enforce compliance, manage the cold chain, and turn supply guesswork into a clear daily picture.

*"Scan it, log it, deduct it. The platform handles the rest."*

## WHY EMS AGENCIES CHOOSE US

WHAT YOU GET	WHAT YOU'RE DOING NOW	WITH EMS TRACK LIVE
Industry fit	Generic warehouse software	<ul style="list-style-type: none"> <li>EMS, Air Medical, Hospital-Based Services</li> </ul>
Controlled substances	Paper logs and locked safes	<ul style="list-style-type: none"> <li>DEA-compliant, dual-witness, immutable ledger</li> </ul>
Blood products	Not supported	<ul style="list-style-type: none"> <li>Full cold-chain with excursion investigations</li> </ul>
Demand forecasting	Reactive reorder points	<ul style="list-style-type: none"> <li>AI-predicted stockouts with seasonal trends</li> </ul>
Receiving	Manual paper trail	<ul style="list-style-type: none"> <li>Mobile receiving with discrepancy tracking</li> </ul>
Mobile experience	Web wrapper	<ul style="list-style-type: none"> <li>Native iOS / Android, GPS, offline, QR scan</li> </ul>

## CORE CAPABILITIES

### A AI Decision Engine

Demand forecasting, wastage reduction, PAR optimization, voice logging.

### C Controlled Substances

DEA containers, dual-witness waste, scheduled audits, full chain of custody.

### B Blood Products

End-to-end cold-chain tracking with temperature excursion investigations.

### L Live Operations Map

Real-time GPS unit tracking, ADS-B aircraft, station-level inventory drill-down.

### P Procurement Workflow

Approval workflows, full PO lifecycle, contract pricing, audit log.

### E Enterprise Security

SAML 2.0 + OIDC SSO, encryption at rest, row-level multi-tenancy, audit logging.

BUILT FOR | Ground EMS · Air Medical · Hospital-Based EMS · CCT · Fire-Based EMS · Distributors

## FROM CLIPBOARD TO COCKPIT

Daily PAR checks, restock alerts, blood administration, and DEA-compliant counts, all in one app.

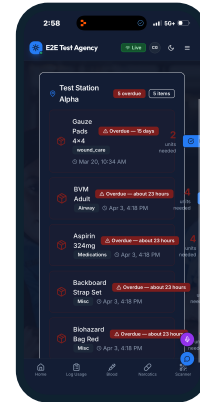

01

### Daily PAR Check

Crews open their unit, see every compartment, and bring shorts back to PAR with one tap. Notes and review state are captured automatically.

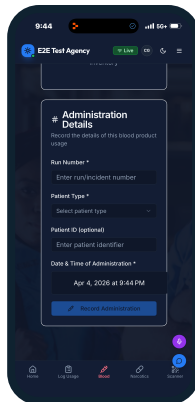

02

### Overdue Restock Watch

The moment a unit slips past PAR, supervisors get a live watchlist with units needed and exactly how long every line has been out.

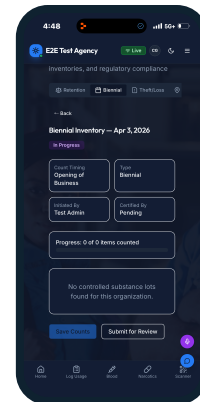

03

### Blood Product Administration

Capture run number, patient type, time, and destination facility for every unit administered. The cold-chain record builds itself.

04

### Biennial Narcotic Count

DEA-aligned biennial inventory with timing, witness signing, progress tracking, and a saved compliance record on the dashboard.

# EMS Track LIVE

THE AI LAYER · BUILT INTO EVERY MODULE

Eight production AI features that crews and supervisors use every shift.

## AI THAT EARNS ITS KEEP

Real models, real data, real workflows. Every feature listed ships today and runs against your live operating data.

### 01 AI Assistant

Ask anything about your live inventory, expirations, low-stock alerts, and asset readiness. The assistant is grounded in your real data, not generic answers.

### 02 Natural-Language Search

Search across stations, units, lots, and compartments in plain English. "The blue bag in Medic 4" finds the right compartment without keyword guessing.

### 03 Voice Usage Logging

Dictate usage on the run. "Used 2 boxes of gauze and 1 nasal cannula on run 4521." The AI matches your catalog and logs run number, items, and metadata.

### 04 AI Report Builder

Ask any operational question in plain English. Get back a structured report with summary, key data points, and AI-derived insights ready to share.

### 05 AI Executive Summaries

Leadership-ready 90-day narratives covering inventory health, usage trends, compliance gaps, and prioritized action items, refreshed on demand.

### 06 Blood Demand Prediction

30, 60, and 90-day forecasts by blood type using historical usage, seasonal patterns, and patient demographics. Stock-level recommendations included.

### 07 Blood Wastage Reduction

Identifies units approaching expiry and suggests redistribution to higher-volume stations before they are written off. Estimated savings shown per run.

### 08 PAR Level Optimization

Analyzes 90 days of usage velocity and variance to recommend optimal PAR levels at every location, with a confidence score on each recommendation.
